The Life/form® Adult & Infant Auscultation Training Set includes innovative auscultation training simulators that deliver site-specific sounds heard through the SmartScope® or external speaker system. This cost-effective set includes the Life/form® Auscultation Trainer and SmartScope® (LF01142) and the Life/form® Infant Auscultation Trainer with Airway Management (LF01201). The adult trainer has six

anterior heart sites with 12 conditions and five anterior, 10 posterior, and two midaxillary locations with 16 conditions. The infant trainer has one anterior heart site with 11 conditions, two anterior and two posterior lung sites with nine conditions, and one bowel sound site with four conditions. The conditions are selected through a remote control, and the sounds are heard through a SmartScope®. Airway management and umbilical cannulation can also be performed on the infant. For classroom training, consider adding the Amplifier/Speaker System (LF01189).

Note: One remote and one SmartScope® can be used to program multiple trainers within a 100-ft. radius; however, adult remotes and SmartScopes® are only compatible with Adult Auscultation Trainers, and infant remotes and SmartScopes® are only compatible with Infant Auscultation Trainers.
