Our anatomically accurate trainer is an ideal platform for teaching and learning 'hands-on' male pelvic examination and diagnosis.

The user-friendly design, combined with clear anatomic landmarks and a range of pathologies creates a realistic training experience for students across all levels of healthcare education.

Skills Gained:

- Correct examination procedure of male pelvis
- Examination and evaluation of:
 - Normal anatomy
 - Testicular abnormalities
 - Abdominal and pelvic pain
- Dry catheterisation

Product Anatomy:

- Abdomen, pelvis and genitalia
- Anatomy of the groin with clear anatomical landmarks:
 - Anterior Superior Iliac Spine (ASIS)
 - Pubic symphysis and tubercles
- Genitalia includes:
 - Penis – both circumcised and non-circumcised
 - Scrotum – containing testicles with epididymis and vas deferens
- Pathologies:
 - Testicular tumor and penile cancer
 - Epididymal cyst
 - Varicocele
 - Orchitis / epididymo-orchitis
 - Hydrocele
 - Indirect inguinal hernia

Product Qualities:

- Soft tissue genitals and abdominal wall
- Soft tissue inserts can be removed and replaced
- Can be used in 2 positions (standing and supine)
- Modules 5 & 7 contain latex
- Skin surface washable using soap and water

You will receive:

- 60952 CMPT Module 1: Normal
- 60953 CMPT Module 2: Varicocele
- 60954 CMPT Module 3: Tumors
- 60955 CMPT Module 4: Epididymal Cysts
- 60956 CMPT Module 5: Hydrocele
- 60957 CMPT Module 6: Orchitis/Epididymo-orchitis
- 60958 CMPT Module 7: Indirect Inguinal Hernia
- 60959 CMPT Abdominal Insert
- 60960 2 CMPT Pubic Bone
- 60961 2 CMPT Foreskins Pack (each pack contains 2 foreskins & 3 lubricant sachets)
- 1 Lower torso
- 1 Support base
- 2 Carry cases - 1 modules, 1 trainer
