This female Muscle Figure provides the same quality characteristics as the model B50, the muscle figure is delivered without internal organs, brain, and male genitalia providing for unobstructed study of the human musculature.

The female muscle figure includes the following features:

- 5 arm/shoulder muscles
- 8 leg/hip muscles
- Detachable arms, leg, head and abdominal wall for detailed study

The complete muscle figure is a great educational tool for teaching and studying the anatomy of the human musculature.

On a stable metal stand with 5 casters!
