How big is a normal child shortly before birth? How does a female uterus accommodate a 9-month-old fetus? Answer these questions and more in an engaging, hands-on manner with the RealCare™ Pregnancy Torso. This lightweight, plastic mold depicts a vertical cross section of the female pelvis during the 9th month of pregnancy. It features detailed renderings of the bladder, rectum, abdominal and pelvic muscles, and includes a life-size 3-month old fetus and uterus mounted on the base for comparison. Comprehensive, 3-lesson curriculum is included.

**Target Audience:**

- Middle school or high school students
- Community education programs
- Public health programs
- Clinical education programs

**Use the torso and curriculum to address:**

- Monthly fetal development stages
- Trimester characteristics
- Healthy eating during pregnancy
- What to avoid during pregnancy
- Genetic diseases
- Pregnancy symptoms and discomforts
