This special version of our famous skin suture pad for skin suture trainer 7060 allows training of intracutaneous suture in a very impressive way. The upper skin layers are made of transparent materials to allow the visualisation of the thread path inside the skin. This allows completely new teaching and training opportunities. We want to thank the Teaching and Learning Centre of the medical faculty of the University Duisburg-Essen for suggesting this product and for their support during development. Pad only - Jig not included.
