Parameters

Quantitative unit

ks

The Standard Catheterization Trainer Set contains both Male and Female Catheterization modules and a single pelvic shell that is compatible with both units.

This cost-effective set allows the trainees to learn urinary and suprapubic catheterization techniques. The feel of the catheter passing along the urethra into the bladder corresponds closely to real life.

VERSATILITY

- Easily interchangeable male and female modules
- Ability to view catheter path
- Non-drip valve
- Reusable double-sleeve catheter packaging is supplied for teaching aseptic technique
- Syringe supplied with water-based lubricant to simulate proprietary local anaesthetic gel

SKILLS GAINED

- Correct handling of male and anatomy
- Aseptic catheterization technique
- Withdrawal of catheter
- Urinary catheterization
- Fluid management
- Suprapubic catheter management
