Innovative CPR model with electronics monitoring the number of chest compressions according to current Guidelines

Realistic look and feel, this is a unique model in its category.

Prestan CPR monitor counts and averages the number of chest compressions per minute and immediately signals the given rate using LEDs to the student or instructor. Every student can learn indirect heart massage at the right speed to make first aid as effective as possible.

Thanks to the patented design system, the need to tilt the head during artificial respiration is realistically simulated. If the student does not perform a head tilt, the airway will be blocked.

All PRESTAN Professional Manikins are available with a revolutionary CPR Rate Monitor that allows for instant feedback to both instructors and students. Every student can learn indirect heart massage at the right speed to make first aid as effective as possible.

The visual feedback from the CPR Rate Monitor gives students a real life feel of delivering 100-120 compressions per minute. Lights continually signal rate progression, confirming compressions are within the 100- 120 cpm range recommended by the Industry Guidelines. The yellow light will blink if the 120 cpm upper limit is exceeded, warning students to slow down. Instructors can monitor several students quickly and easily.

In addition to the visual CPR Rate Monitor, students will also hear a clicker sound as the chest is pushed to the appropriate depth of 2.0 -2.4 inches allowing them to experience the true force needed to deliver real life chest compressions.

Sleep Mode/No Power	
1st Full Compression (Wake mode/LED Test Mode)	
CPM* < 60	
CPM* 60 – 79	
CPM* 80 – 99	
CPM* 100 - 120	
CPM* > 120	
Compressions Stopped	

*CPM = Compressions per minute

 = Flashing

Set includes:

- 2× Adult manikin, 2× Infant manikin (light skin tone; all with CPR monitor)
- 2× Prestan Professional UltraTrainer
- 10 lung bags for adult manikin
- 10 lung bags for infant manikin
- transport case
- manual
