DANi is an advanced training solution designed to support training on the fundamentals of nursing and EMS procedures for issues relating to drug abuse, sexual assault, mental health, or self-harm. Learners can practice on a comprehensive and complete simulation platform including patient monitoring capability and auscultation (heart and lung sounds).

DANi accurately reproduces scenarios and challenging dynamics for learners to administer critical care for this important patient demographic.

A realistic, hands-on learning experience ideally suited for classroom, in-situ, or hospital instruction.
