This newborn doll is especially suitable for diapering and nursing classes for expectant parents. The movable model is suitable for holding and carrying exercises, navel care practice, skin care and swaddling exercises. The model weighs about 2,4 kg but is perceived as heavier due to the lack of residual stress compared to a real baby. Due to the slightly open mouth, the model can also be used conditionally for breastfeeding exercises. The model has a navel rest, a variety of skin wrinkles which is very suitable for the practice of cleaning the body. Head, arms and legs are movable by swivel joints. Light skin color, height about 50cm.
